WORK EXPERIENCE

Company: GIAI PHAP TU DONG DIEN (EAS) -----**(01/2026 - Present)**

My Position: FullStack Developer

Description: A comprehensive enterprise management system developed for GIAI PHAP TU DONG DIEN (EAS) Company (<https://giaiphaptudongdien.com>). The system connects Admin, Employee & Partner roles within a centralized platform, supporting the management of personnel, equipment, tasks, attendance, partners, contracts, payment records, construction logs, and internal documents — with detailed, module-based access control.

Company: BinhMinh Group (BMG) -----**(07/2025 - Present)**

My Position: Frontend Developer

Project 1: VietNEST

(Link: <https://vietnest.au>)

Description: VietNEST is a specialized Vietnamese learning platform featuring interactive games like Dictation, Video Quizzes, Rocket of Knowledge, Say It Right, Word Searches,... for students and teachers.

My responsibilities:

- Built core interfaces including the Quiz Hub, Classroom, Course, Reward, and Settings pages from Figma mockups.
- Integrated RESTful APIs and implemented complex game logic for student-side interactive modules.
- Designed & developed transactional HTML email templates for user notifications & communications.
- Implemented multi-language support, automated translation, and dynamic themes (multi-theme).

Project 2: PleaseSpeak **(Link: <https://pleasespeak.vn/competitions/67a9b48296164de93de50a91/start>)**

Description: PleaseSpeak is an innovative language learning platform leveraging AI technology for real-time pronunciation evaluation and adaptive exercises, inspired by Duolingo.

My responsibilities:

- Converted complex Figma UI designs for Admin and Teacher dashboards into responsive React.js components.
- Developed and customized interactive data visualization charts to track student progress.
- Managed bug resolution & feature tracking through Jira, coordinating closely with testers for UI/API fixes.

Company: GENSOL CO., LTD (representative of DEL QUI CO., LTD) -----(04/2025 - 07/2025)

My Position: Frontend Developer

Project: GENSOL & DEL QUI

(Links: <https://del-qui.com>, <https://gensol.com.vn>)

Description: Corporate landing pages for GENSOL and Del Qui - Vietnamese and Japanese technology solutions companies. Featured modern, responsive designs with interactive 3D elements, multi-language support, and advanced contact integration.

My responsibilities:

- Served as the main Frontend Developer for both projects, implementing complete frontend architecture using Next.js, TypeScript, TailwindCSS & ShadCN/UI.
- Integrated comprehensive internationalization system and advanced contact forms.
- Developed and deployed Del Qui website within 2 days, showcasing rapid development capabilities.

Company: Lurny (Lurny K&P) -----(02/2025 - 04/2025)

My Position: Frontend Developer

Project: Elurny

(Link: <https://elurny.com>)

Description: A polished & responsive Frontend for Lurny KxP, an AI-powered knowledge exchange platform that transforms traditional learning through voice, micro-content & gamification..

My responsibilities:

- Implemented the entire frontend architecture using React and TypeScript.
- Translated and developed all UI designs from Figma into fully functional interfaces.
- Created responsive layouts for multiple viewports including mobile, tablet, desktop, and large desktop.
- Directly interacted with clients on Upwork to clarify requirements and provide project updates.

Company: FPT Software, Ho Chi Minh City -----(10/2024 - 02/2025)

My Position: Intern FullStack Developer

Project: Real-time ChatApp

Description: A real-time communication platform designed for seamless messaging and efficient data handling across distributed teams.

My responsibilities:

- Contributed to the development of ChatApp, a real-time interaction platform, by implementing responsive user interfaces using Next.js based on provided designs.
- Developed and integrated backend APIs with Django, successfully migrating data from MongoDB to PostgreSQL, and optimized code to enhance overall application performance.
- Utilized Podman for containerization and environment management to ensure consistency across development and QA teams.
